Report and Financial Statements

Semi-Annual Report 2024

Welcome Message

31 August 2024

Dear Customer,

Thank you for choosing Manulife as your preferred financial partner.

This booklet contains the Semi-Annual Report for our Investment-Linked Policy Sub-Funds which provides an overview of each fund's investment objectives and performance.

To ensure that you are best positioned to meet your financial goals, we encourage you to review your investments regularly and maintain a well-diversified portfolio. We will continually look out for opportunities to help you grow your wealth.

Manage your investments with **MyManulife**

We would also like to encourage you to use our secure customer portal, **MyManulife**, to access your policy information and manage your investment online at your convenience.

With **MyManulife**, you can:

- log in securely with Singpass or your email and password;
- perform transactions such as fund switches and premium redirections;
- update your contact information and other personal details; and
- download and view past policy statements and contracts.

To register or log in to your account, please follow the instructions on www.mymanulife.com.sg.

If you have any enquiries, please contact your Financial Representative or email us at **service@manulife.com**.

Thank you for your continued support and we look forward to serving you in the years ahead.

Yours faithfully

Dr Khoo Kah Siang
President & Chief Executive Officer
Manulife Singapore

If you would like to receive a hard copy of this booklet, please email us at service@manulife.com by 30 September 2024.

The booklet will be mailed to you within 2 weeks upon receiving your request.

Financial Institution Representatives Register (FIRR) - You may logon to the Monetary Authority of Singapore ("MAS") website (www.mas.gov.sg) to conduct a background check of your Manulife Financial Representative.

The information relating to the Investment-Linked Policy ("ILP") sub-fund is compiled by Manulife (Singapore) Pte. Ltd., solely for general information purposes. It does not constitute an offer, invitation, solicitation or recommendation by or on behalf of Manulife (Singapore) Pte. Ltd. to any person to buy or sell any ILP sub-fund.

All overviews and commentaries, if provided, are intended to be general in nature and for current interest. While helpful, these overviews and commentaries are no substitute for professional tax, investment or legal advice. Investors are advised to seek professional advice for their particular situation. The information provided herein does not take into account the suitability, investment objectives, financial situation or particular needs of any specific person. Investors should consider the suitability of any ILP sub-fund based on his or her investment objectives, financial situation and particular needs before making a commitment to subscribe for units, shares or any other interests in any ILP sub-fund.

Investments in ILP sub-funds are not deposits in, guaranteed or insured by Manulife (Singapore) Pte. Ltd., its partners or distributors. The value of units in any ILP sub-fund and any income accruing to it may rise as well as fall, which may result in the possible loss of principal amount invested. Past performance of any ILP sub-funds or fund managers and any prediction, projection or forecast on the economy or markets are not necessarily indicative of the future or likely performance of the ILP sub-funds or the fund managers. Investors should read the relevant Manulife Fund Summary and Product Highlights Sheet before deciding whether to subscribe for or purchase units in any ILP sub-funds.

Investment and Market Review***

The fund outperformed the reference benchmark in the first half of 2024 (H1 2024), driven by positive stock selection in China, the Philippines, and Hong Kong. Offsetting this was negative allocation to Hong Kong (overweight) and India (underweight).

In Taiwan, our overweight exposure to TSMC outperformed, led higher by the company's exposure to AI and expected robust demand for its N3 and N5 semiconductors. In Korea, our overweight position in Samsung Fire & Marine Insurance also did well after the company announced a capital management framework that surprised the market on the upside. In the Philippines, our overweight exposure to ICTSI also outperformed along with the domestic equity market and improving sentiment on global trade, while the company also reported an earnings beat and increasing optimism for its business in 2024.

Conversely, in Korea, our overweight position in Samsung Electronics was a key underperformer as shares did poorly given delays in its high-bandwidth memory qualifications implemented by Nvidia. In Taiwan, our nil position in Hon Hai was another key detractor as shares did well on the back of expected strong demand for AI

Manulife Pacific Equity Fund

servers and improving sentiment on stocks related to the Apple supply chain. In Australia, our overweight position in Seek underperformed after the company reported a H1 2024 results miss given a decline in ad volumes, while management also revised its full-year guidance downwards.

Market Outlook and Investment Strategy***

We continue to expect structural deflationary forces to play out in Asia through the 4 Ds of ageing Demographics, technological Disruption, income Disparity and still-elevated Debt levels, which should underpin lower interest rates in the long term. Bond proxies such as dividend stocks are key beneficiaries in such an environment, which would be supportive of the strategy's performance going forward. Additionally, Asia continues to offer some of the highest dividend yields globally and the best prospects for future dividend growth and surprises. We remain steadfast in keeping our portfolio diversified across Dividend Cows, Growers and Surprises, which ensures that there will always be categories of dividend stocks that outperform at different stages of the market cycle.

Within the region, the developed markets of Australia, Singapore, and Hong Kong continue to provide the best candidates for dividend-investing given a combination of factors which include well-regulated capital markets, relatively mature and wealthy economies, functioning property rights, effective governments, and stable politics. In Australia, our favoured exposures include the diversified miners given their high quality and cost-efficient assets as well as global industry leaders in health care like specialty biotechnology company CSL and sleep apnea mask maker ResMed. In Singapore, we like select banks with market leadership across the region and the potential for improved capital management and shareholder returns. In Hong Kong, we remain selective here despite high headline yields, primarily driven by the real estate sector, as we question the long-term dividend sustainability for this sector. Instead, we currently find the most attractive dividend ideas in companies like pan-Asian insurer AIA and global power tools leader Techtronic Industries.

The other significant exposure for the fund remains in regional technology, particularly in Taiwan and Korea. We continue to be bullish on the long-term outlook for the semiconductor sector on the back of ongoing digitalisation and high returns on capital available from a consolidated industry. However, we are increasingly concerned about the ongoing AI thematic which has pushed valuations of many stocks in the sector far beyond what they are intrinsically worth. Our favoured positions here are in Taiwanese foundry TSMC which continue to

be a monopolist at leading-edge fabrication, integrated chip designer Mediatek, and Korean memory player Samsung Electronics. Valuations for these names remain reasonable while positive long-term fundamentals should continue to play out and support sustainable and growing dividend trajectories.

In China, the issues around the property sector remain structural and will continue to drag on both the economy and financial sector. The current policy response is not likely to be helpful for stock market returns and instead is likely to exacerbate the underlying deflationary forces in China resulting from excessive debt and aging demographics. The backdrop for a pick-up in consumer demand also looks difficult, while policy focus clearly remains on the supply side specifically on national security and new productive forces. All of the above are likely to be negative for long-term stock market performance in China. That said, we still find good dividend opportunities here, namely consumer names that can benefit from downtrading or disruption, cash-flow generative internet stocks that are in favourable competitive environments or are improving their capital management policies, and selected exporters where products are less sensitive to trade tensions given geographically-diversified production locations.

In India, the structural growth story (favourable demographics, ongoing urbanisation and industrialisation, rising disposable incomes, robust GDP growth) remains intact but is now well understood by the market given how markets have performed recently. Additionally, increased domestic retail participation as well as a desire from foreign investors to find alternatives to China have led to valuations reaching all-time highs, particularly in the mid- and small-cap space. It remains therefore critical to be selective here, investing in companies where both fundamentals and valuations make sense. In that regard, we continue to be invested in selected Indian private banks like HDFC Bank and IT consulting names here.

On 2 October 2017, the Manager was changed from UOB Asset
Management Ltd to Manulife Asset Management (Singapore) Pte.
Ltd.

Fund Objective

The ILP Sub-Fund invests all or substantially all its
assets into Manulife Global Fund – Global Equity Fund
("Underlying Fund"), which is a sub-fund of Manulife
Global Fund ("MGF"). MGF is constituted in Luxembourg.
The investment objective of the Underlying Fund is to
achieve capital growth from a balanced portfolio of
international securities. The Underlying Fund is designed
as a relatively lower risk way of participating in world
stock markets and offers an alternative to the other, more
aggressive, regional investments. The benchmark against
which the ILP Sub-Fund's performance will be measured
is the MSCI World Index.

Investment and Market Review***

Global equities finished the second quarter of 2024 with
positive performance, as investor sentiment remained
supported by stable global growth trends and healthy
corporate earnings. The US was a notable performer due
in part to persistent strength in mega-cap technology
stocks, which was spurred in part by continued excitement
about the growth potential of artificial intelligence. Europe
performed well overall, but stocks finished well off of their
mid-quarter highs following surprising election results in
France and other nations. In Asia, Japan was a notable
detractor due to pronounced weakness in the Japanese
yen. Emerging markets outpaced their developed market
peers behind strong gains for China, India, and Taiwan.

The market environment was difficult for the Fund as the
MSCI World Growth performed well during the first half
of 2024. Due to the portfolio's quality value focus, this
magnitude of growth leadership has historically been a
performance headwind and this period was no exception,
supporting the fund's detractor.

Specifically, stock selection was a significant detractor
to fund performance for the period, driven by regional
stock picks within the US and Europe, as well as within
the information technology, energy, and consumer
discretionary sectors. An underweight exposure to the

Manulife Golden Worldwide Equity Fund

information technology sector along with overweight exposures to Europe ex UK, emerging markets, and the materials sector also added to the decline. Among the largest individual detractors included a leading electronics company, a French multinational retail and wholesaling corporation, and a Japanese robotics and computer company.

Offsetting a portion of the detractor was stock selection within Japan and within the financials and materials sectors. Among the notable individual contributors included a Japanese financial holding company, a computer technology company, and a Dutch banking and financial services company.

Among the major purchases during the period included a healthcare company and communication services companies. Meanwhile, the most significant sales were an information technology company, healthcare company, and financials company.

Market Outlook and Investment Strategy***

We believe the interest rate policy will be a critical component to market sentiment in 2024.

The Japanese yen further weakened, mainly due to the strength of the US economy and receding market expectations for a rate cut by the US Federal Reserve Board (US Fed). The Bank of Japan (BoJ) did not take further action for policy tightening at the April policy meeting. Although there are no clear signs of a recovery in consumer sentiment or real wage growth, the labour market remains tight, and gradual wage increases are expected to support consumption in the coming months. Additionally, the record-high number of inbound tourists is anticipated to contribute to the economic recovery. The BoJ will meet in July and there is pressure on them to deal with the ongoing yen weakness. We will continue to monitor this but on a longer term, we believe we are at the beginning of an increasing interest rate cycle and continue to overweight the region.

Euro-zone shares moved lower in Q2 as equities fell amid uncertainty caused by the announcement of parliamentary elections in France and dwindling expectations for steep interest rate cuts. The European Central Bank cut interest rates by 25 basis points in early June. However, the scope for further cuts may be limited by continued inflation where annual inflation in the euro area was 2.6% in May, up from 2.4% in April.

Having suffered a mild recession over the second half of 2023, it was confirmed the UK economy rebounded strongly in Q1 2024. However, more recent data revealed

growth had stagnated in April. The annual consumer prices index inflation fell back to 2.0% in May, hitting the Bank of England (BoE)'s target for the first time since July 2021. Despite slowing UK growth and encouraging inflation trends, the BoE maintained base interest rates at 5.25% amid market concerns that the fall in UK inflation may only be temporary, and that high wage inflation is driving the elevated annual rate of inflation in services. Prime Minister Rishi Sunak began the process to form the next government by calling for a general election to be held on July 4. We continue to overweight Europe and underweight the UK, but will continue monitoring these elections and our exposures to the region.

US shares gained in Q2, led higher by the information technology and communication services sectors. Ongoing enthusiasm around AI continued to boost related companies amid some strong earnings and outlook statements. Among financials, numerous US banks announced plans to increase dividends after passing annual stress tests from the US Fed. The likely timing and extent of interest rate cuts remained a key focus for markets in the quarter. The latest "dot plot", showing the rate setting forecasts of US Fed policymakers, indicated just one rate cut this year. In our opinion, a structurally higher inflation rate going forward than what we have seen over the last decade may be beneficial as it helps stimulate GDP (gross domestic product) while eroding the real value of debt. This should benefit traditional tangible assets going forward. We continue to underweight the US.

From a sector positioning standpoint, overweight stocks include industrials, consumer staples, financials, and materials, while the underweight ones are information technology, healthcare, real estate, and consumer discretionary. With the team's focus on owning quality companies trading at attractive prices, a portfolio beta that is lower than the benchmark and our keen attention to downside market protection, we believe the product is appropriately positioned to withstand varied market conditions.

Note: *** Information given relates to the Underlying Fund and is provided by the Manager.

Manulife Funds – Manulife Asia Pacific Investment Grade Bond Fund

Fund Objective

The Fund seeks to maximize total returns from a combination of capital appreciation and income generation through investing primarily in a diversified portfolio of investment grade debt securities issued by governments, agencies, supranationals and corporate issuers in the Asia Pacific region.

Investment and Market Review***

In the US, Treasury yields trended higher in the first half of 2024 (H1 2024) as the market pared back interest rate cut expectations amid a continued hawkish stance by the US Federal Reserve (Fed) due to stickier-than-expected inflation data. The Fed kept its interest rate unchanged at 5.25% to 5.50% over the period. Dot plots after the June Federal Open Market Committee (FOMC) meeting indicated the possibility of having one cut by the end of 2024. On the economic front, the US first-quarter 2024 gross domestic product (GDP) increased by 1.4% (quarter-on-quarter, annualised). The personal consumption expenditure price index, the Fed's preferred measure of inflation, rose 2.6% year-on-year (YoY) in May, in line with estimates, while non-farm payrolls increased by 272,000 in the same month, above market estimates. Over the period, the 10-year US Treasury yield trended higher from 3.88% to 4.40%.

In Mainland China, data released over the period showed an economic acceleration. The Caixin Manufacturing Purchasing Managers' Index (PMI) ticked up to 51.7 in May from 51.4 in April, remaining in expansionary territory (above the 50 mark) and reaching its highest point since July 2022 on the back of expanded production. First-quarter GDP increased by 5.3% YoY, above estimates. Over the period, the People's Bank of China (PBoC) cut reserve ratio requirements (RRR) by 50 basis points (bps) to 10% and the 5-year loan prime rate by 25 bps to 3.95%, respectively. Towards the end of the period, Mainland China started issuing RMB 1 trillion worth of ultra-long special government bonds to support the budget. Mainland China's local government bond yields trended lower over the period. In India, government bond yields had a volatile path towards the end of the period in response to the general election result. Prime Minister Narendra Modi's party surprised the market by not winning a majority in the final election results. However, the market settled after cabinet appointments suggested policy continuity. In June, Indian sovereign bonds were officially added to J.P. Morgan's Government Bond Index-Emerging Markets (GBI-EM) suite. On the economic front, India's first-quarter GDP grew by 7.8%, above estimates, while inflation decelerated in May (4.75% YoY). India's local government bond yields trended lower over the

period. In Indonesia, Bank Indonesia (BI) surprised the market and increased its key interest rate by 25 bps to 6.25% to support its currency in April. Inflation in April rose by 2.84% YoY, below estimates, while first-quarter GDP grew by 5.11%, above estimates. Towards the end of the period, there were fiscal concerns in the market as an article suggested President-elect Prabowo is planning to increase Indonesia's debt ratio to 50% of GDP from 39% over the next five years, which was then denied by Prabowo's team. Indonesia's local government bond yields rose over the period.

Asian investment grade (IG) credits posted positive returns over the period, largely driven by tighter credit spreads and positive carry. Credit spreads on the J.P. Morgan Asian Investment Grade Corporate Bond Index tightened by 32 bps; the index increased by 2.48% in US dollar terms. Asian IG tightened as trading technicals remained supportive amid positive headlines on rating actions and stable corporate earnings results. Towards the end of the period, Mainland China announced new measures to support the property sector. For example, a RMB 300-500 billion re-lending program was introduced to finance local state-owned enterprises (SOEs) purchasing completed but unsold properties, and mortgage rates for first homebuyers were lowered by 25 bps. The new issuance market picked up towards the end of the period amid lower US interest rates; primary activities were seen in Mainland China, South Korea, Philippines, Indonesia, and Australia.

The Singapore dollar weakened by 2.63% against the US dollar, while most of the major Asian currencies also weakened against the US dollar over the period. The Indian rupee was a regional performer amid the strengthening economic growth in the first quarter of 2024 and a narrowing current account deficit. In contrast, the Thai baht lagged amid deteriorating fundamentals and the government's numerous efforts to influence the Bank of Thailand.

The Fund's exposure to BBB-rated corporates in Mainland China and Indonesia was the main contributor to performance amid the strong credit rally over the period. In addition, the overall currency exposure also contributed. The underweight to the South Korean won and zero exposure to the Taiwanese dollar were notable contributors amid weakened currencies against the Singapore dollar. Furthermore, the Fund's active management on Chinese interest rate duration contributed positively, while the overweight to long-end US interest rate duration slightly detracted amid higher US interest rates.

Manulife Funds –

Manulife Asia Pacific Investment Grade Bond Fund

Over the period, we actively managed our duration while remaining positive on selective Asian local bonds, for example in India and Philippines, as they offer attractive yields in our opinion. In addition, we added Chinese local rates at the beginning of the period amid expectations of easing monetary policy, while we tactically took profit and partially reduced the exposure over the period. Moreover, we also took profit and trimmed the USD-denominated bonds of selective Chinese property developers and Macau gaming operators, after a strong rally amid new supportive measures. Towards the end of the period, we rotated exposure into the defensive spaces, such as the USD-denominated bonds of a Hong Kong SAR financials company and a Taiwanese insurance company. On the currency front, we increased US dollar exposure against the Singapore dollar towards the end of the period.

Market Outlook and Investment Strategy***

We believe the Fed and other global central banks transitioning to end their interest rate hike cycles in 2024 would help underpin global and Asian bond markets. In the Asia ex-Mainland China region, we believe Asian central banks, such as India, South Korea and Philippines, have room to cut interest rates in 2024 amid a benign inflationary environment. At the National People's Congress, Chinese authorities kept their growth target at around 5%, inflation target at around 3%, and fiscal deficit target at 3% for 2024. Mainland China also started the issuance of RMB 1 trillion worth of ultra-long special government bonds to support the budget. We expect additional monetary policy easing and more targeted measures from authorities to support the Chinese economy. Furthermore, to see a sustained recovery of the Chinese property sector, we would monitor the effective implementation of the announced measures and market sales recovery.

Notes To The Accounts

1. Material accounting policy information

- (a) **Basis of Accounting**
The accounts of the Manulife Investment-Linked Policy sub-funds, expressed in Singapore dollars, are prepared under the historical cost convention except for the investments which are stated at market value.
- (b) **Cash and Cash equivalents**
Cash and cash equivalents comprise cash deposited with financial institutions that are subject to an insignificant risk of changes in value.
- (c) **Investments**
Unit trusts are valued at the market prices on 30 June 2024.
- (d) **Investment Income**
Dividend income is taken up in the financial statements when it is declared payable.

Interest income is recognised using the effective interest method.
- (e) **Foreign Currencies**
Transactions arising in foreign currencies during the period are converted at rates closely approximating those ruling on the transaction dates. Foreign currencies denominated monetary assets and liabilities are translated into local currency at exchange rates ruling on the financial statement date. All exchange differences arising from conversion are included in the capital account.
- (f) **Realised Gain/(Loss) on Sale of Investments**
Gain/(loss) on sale of investments is determined at average cost and includes realised foreign exchange gains and losses.

2. Units

The number of units issued as of valuation date 30 June 2024:
